

DAVID TEIE'S
MusicforCats®

ALBUM TWO | MUSIC FOR SHARING

Discover music to share with your cat. Here's how a second album of Music for Cats came about: My first species-specific music calmed the monkeys it was written for, but the researchers who conducted the study found it to be irritating. Music for cats would be next, but if cat owners find the music to be irritating, they will not be inclined to play it for their furry friends.

Solution: I include in the music a bandwidth for humans in a frequency range that is of little consequence to felines (basically, it's traffic noise to them). In the first album, the human component was intended to make the music palatable for cat lovers. For this album I took it a step further and tried to create music that would be appealing to both species... music to share.

The last two songs, "Potato's Song" and "For I Will Consider My Cat Jeffry," are exceptions; they are intended for continuous play on long drives and clinical applications. These two songs have no melodies to get stuck in your ear.

Your interest in this well-researched, tested and proven species-specific music shows that you are a member of a growing community of people who recognize that many animals are sentient, aware, and capable of appreciating beauty—as long as that beauty is designed for them. Spread the word!

Your cat's composer,

David Teie in the recording studio.
